Riverside Electric Vehicle Day
Where: UC Riverside | CE-CERT, 1084 Columbia Ave, 92507
When: Sunday, November 16, 2014 from Noon -3:00pm

JOIN US!
LEARN ABOUT THE BENEFITS OF PLUG-INS

This fun, free family-friendly event will include:
• Electric vehicle test drives
• Information on incentives available to help more Californians drive electric
• An opportunity to learn about UC-Riverside’s groundbreaking electric vehicle research & a tour of CE-CERT’s research center
• Environmental art projects for kids and interactive games for all ages
• Remarks from elected officials about the importance of electrifying our transportation sector

Charge Ahead California is a campaign by the Coalition for Clean Air, Communities for a Better Environment, Environment California, The Greenlining Institute, and the Natural Resources Defense Council to put one million electric vehicles on California’s roads by 2023 and to ensure that low-income communities, which are disproportionately impacted by air pollution, benefit from the transition to zero tailpipe emissions.

CE-CERT, UCR’s largest research center, investigates new ways to produce energy and fuel from renewable sources, efficiently use electric transportation through advanced vehicles and improve our energy efficiency through smart grid development. This research is part of our Center’s mission and part of UC’s move to a net zero campus by 2025.
