

You are invited to our

CE-CERT OPEN HOUSE

Wednesday, May 17th, 2017

3:00pm – 5:00pm

at

1084 Columbia Avenue
Riverside, CA 92507

Free Parking ★ Refreshments ★
Open to the Public

AN AFTERNOON OF RESEARCH ENGAGEMENT

Join research faculty, staff and students for detailed tours of the CE-CERT laboratories and discussions about recent research activities. Open labs include:

Next Generation Technologies for a Sustainable Future

Exploration of our lab to market technologies and the processes and partnerships needed to meet California's sustainability goals.

Nicole Davis, Wayne Miller, Tom Durbin

Aqueous Processing Fermentation

Development of innovative technologies to advance bioenergy-based fuels and materials.

Charles Wyman, Charles Cai, Rajeev Kumar

Intelligent Transportation Systems

Using vehicle and infrastructure communication and automation to reduce congestion and emissions on our roadways.

Matthew Barth, Kanok Boriboonsomsin, Mike Todd, Guoyuan Wu, Peng Hao

Sustainable Integrated Grid Initiative

Researching and implementing microgrid systems that demonstrate successful integration of intermittent renewable energy, energy storage, and electric-drive vehicles.

Sadrul Ula, Alfredo Martinez-Morales, Mike Todd

Emissions, Air Pollution, and Climate Change

Coupling portable air chambers with emission sources to study chemical processes and impacts of these emissions in the atmosphere.

George Karavalakis, Kelley Barsanti, David Cocker, Mark Villela
