

Solar Power: Past, Present, and Its Future in Inland Southern California
March 1, 2018

This fourth annual conference is designed for city leaders, planners, council members, businesses, utility companies, and the general public. Panelists will present on the state of solar energy by discussing the latest technology, public policy/regulations, economics, and the associated environmental/sustainability benefits of renewable energy. Attendees will learn about the challenges and opportunities for incorporating solar energy plus batteries and deploying microgrid systems in their communities, including revenue opportunities, local policies, and initiatives already in place.
