

2018 Portable Emission Measurement Systems (PEMS) Conference Reception

JOIN US AS WE UNVEIL OUR **NEW VEHICLE EMISSIONS TESTING LABORATORY** SPONSORED BY AVL
FREE PARKING, FOOD & WINE!

MARCH 22, 2018 | 6:00 pm—9:00 pm

CE-CERT Administration Building

1084 Columbia Avenue, Riverside, CA 92507

<https://pemsreception.eventbrite.com>

ABOUT THE LAB:

CE-CERT's Light Duty Laboratory utilizes AVL's latest road-to-lab workflow and advanced automation technology. We will conduct an in-depth demonstration of the dynamometer system, including its simulation capabilities for intelligent routing of in-use vehicles and for analyzing optimization strategies. The system can also simulate on-road conditions in the lab allowing for the validation of PEMS measurements. CE-CERT uses this laboratory to conduct its pioneering emissions research on alternative-fueled, conventional, hybrid and fully-electric vehicles, and to provide immersive training courses. This new facility is part of CE-CERT's comprehensive suite of laboratories dedicated to advanced characterization of sustainable transportation options, ranging from heavy-duty trucks to marine vessels.

THANK YOU TO OUR 2018 CONFERENCE SPONSORS!
