

Solar Energy in Inland Southern California: The Future Is Now Feb. 6, 2014

This conference is designed for city leaders, planners, council members, businesses, utility companies and the general public to learn about the state of solar energy by discussing the latest technology, public policy/regulations, economics, and the associated environmental/sustainability issues. Attendees will learn about the challenges and opportunities for incorporating solar energy in their communities, including how the marketplace works, local policies and initiatives already in place.
