THE CLIMATE IS CHANGING.

IS YOUR ORGANIZATION READY?

Professional Development Opportunities in the Fields of Air Quality and Climate Change

As a leading research university in air quality and climate science for more than 50 years, UC Riverside is excited to introduce a professional development program that is designed to prepare the engineers, scientists, technicians, and managers of today and tomorrow to address air quality and climate change challenges.

Technological and scientific advancements in the next decade will revolutionize the way we live. California's future will be one of renewable energy, clean automated and connected vehicles, and ubiquitous data collection and communication for streamlining how we live, work and travel.

This training program, presented by leading experts from academia and industry, will prepare your organization to understand and leverage this rapid transformation.

WHO SHOULD ENROLL

Courses are designed to accommodate all experience levels across a variety of industries, such as:

- Environmental Regulatory Agencies
- Non-governmental organizations, Environmental Agencies and Community Groups
- City and Local Planning Agencies
- Utilities
- Energy Producers
- Automotive Companies
- Logistics
- Environmental Science
- Land Use Developers
