

# National Center for Sustainable Transportation

## Who We Are

The National Center for Sustainable Transportation (NCST) provides national leadership in advancing environmentally sustainable transportation through cutting-edge research, direct policy engagement, and education of our future leaders. The ITS-Davis leads the NCST in partnership with California State University, Long Beach; the University of California, Riverside; the University of Southern California; Georgia Institute of Technology; and the University of Vermont.

## What We Do

The NCST aims to reduce the impacts of the transportation system on our natural resources, including energy, climate, air, water and land, while meeting the mobility needs of society, fostering healthy communities, and supporting economic growth. In response to this challenge, the NCST's research, education, and engagement programs are organized around the following high-priority themes:

- *Environmentally responsible infrastructure and operations*
- *Multimodal travel and sustainable land use*
- *Zero-emission vehicle and fuel technologies*
- *Institutional change*
